

Supplementary online material for

**The Swiss Glaciers 2005/06 and 2006/07**

**Glaciological Report (Glacier) No. 127/128**

This file contains two figures (Figures 1 and 2) with daily values of temperature, sunshine duration and precipitation at the high-elevation climate station Weissfluhjoch (2690 m) of the MeteoSwiss observational network that provide additional information not included in the main document.

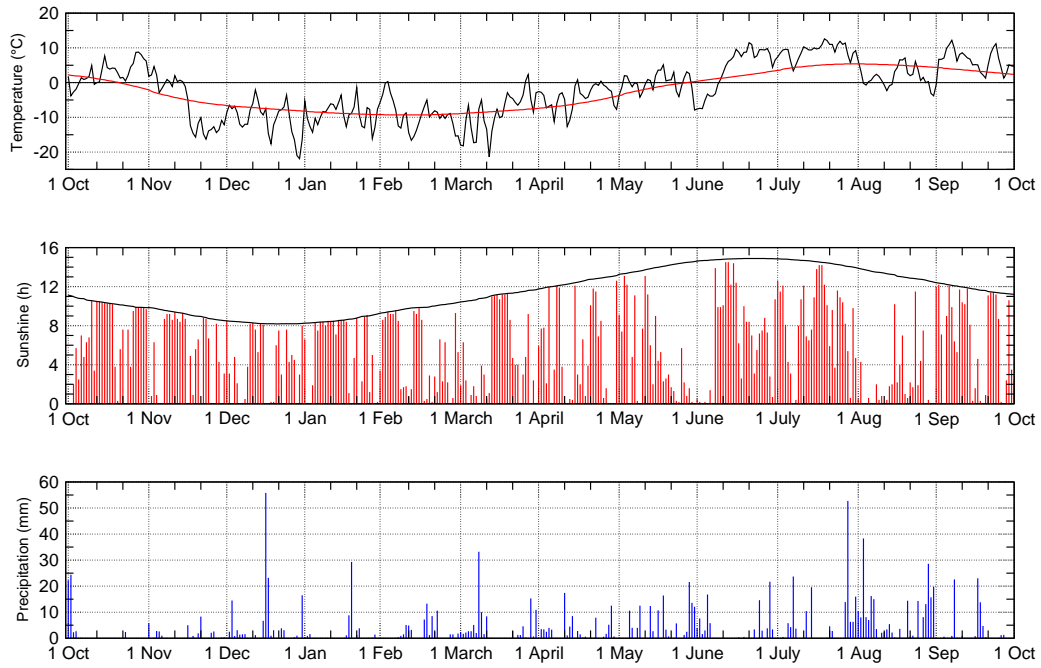

Figure 1: Daily meteorological conditions at Weissfluhjoch for the reporting period 2005/06. top: temperature (black) with long-term mean values (red), center: sunshine duration (red) with theoretical maximum (black), bottom: daily precipitation totals (blue) .

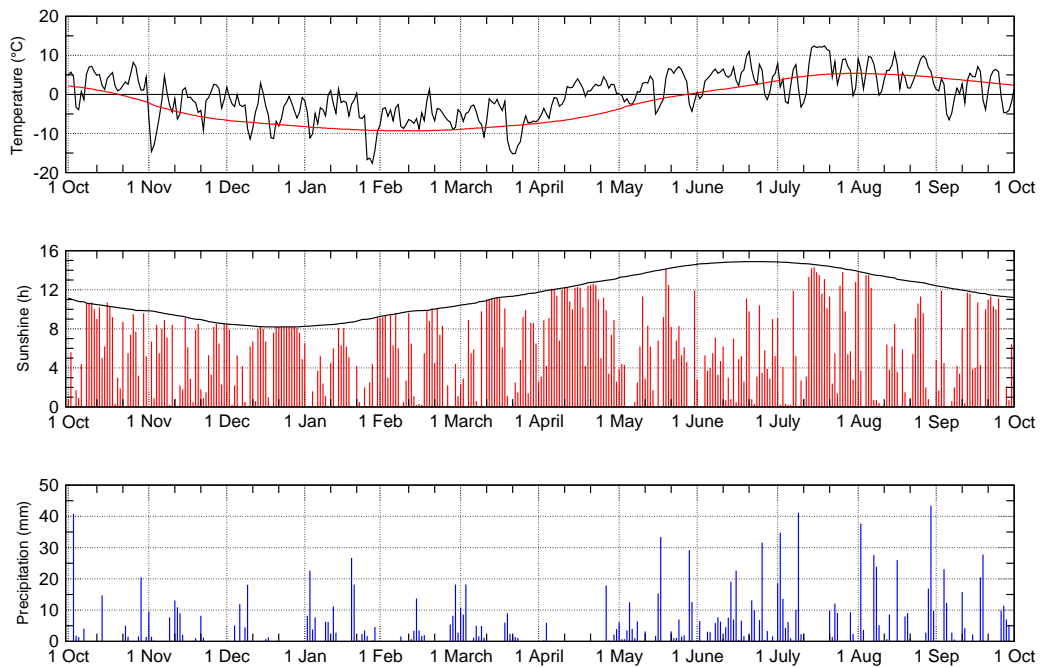

Figure 2: Daily meteorological conditions at Weissfluhjoch for the reporting period 2006/07. top: temperature (black) with long-term mean values (red), center: sunshine duration (red) with theoretical maximum (black), bottom: daily precipitation totals (blue) .
